Maths

- Please make sure you practise with Mathletics. If you do not have access to the internet, please let us know.
 - Think of a number. Find one more and one less than your number.
 - Think of a number. Find ten more and ten less than your number.
-
- You should also practise your number bonds to 10, to 20 and 100.

e.g.

$$8+2=10$$

$$10-8=2$$

And

$$18+2=20$$

$$20-2=18$$

And

$$40+60=100$$

$$100-40=60$$

If you can do lots of different examples of this easily, then move on to:

$$42+58=100$$

$$100-58=42$$

...and keep practising your 2x, 5x and 10x tables!
