

1B's Class Assembly 5.12.18

1B worked really hard to write, practice and perform their assembly in only 3 days! We had lots to talk about for our topic on Dinosaurs.

We took you back in time with our explorers, reporters, palentologist and dinosaurs.

We made our own dinosaur masks during topic time. We roamed around like the dinosaurs used to and our explorers discovered different behaviours that the dinosaurs would have once done.

What dinosaur were you?

Each group spoke about something that they have learned over the last term.

We talked about how we made our junk modelling dinosaurs.

Which dinosaur did you make?

What was your favourite part?

We taught you some of our dinosaur facts we have been learning to write in English.

Do you know any dinosaur facts?

We shared what 1B have been learning and making at Besson Street Community Gardens.

What was your favourite thing?

We showed some of our fantastic and creative things we have made in our Home Learning.

We shared our landscapes and dinosaur fact books.

What was your favourite thing to do in Home Learning?

We were paleontologists and taught you all about what we do and how we discovered the dinosaurs.

Do you know how fossils are made?

How do we know so much about dinosaurs?

We learned the story 'Dinosaur Roar' by Paul and Henrietta Strickland by using actions.

Thank you to everyone that came and watched our assembly.
