

## **The Green Gang**

***The green gang have been working hard together to try to do something about the environment .The whole school has been collecting crisp packets and sending them to a recycling centre . So far we have collected many thousands of crisp packets which can be turned into watering cans and benches.***

***Now we are focusing on the issue of idling. Our plan is to place wooden cut outs of children outside of school reminding people to stop idling. We hope that they will show people it is wrong to idle and the children cut outs will get dirtier and dirtier if people idle because of the pollution in our environment.***

***Check back soon for updates.***
