

Year 2 Home Learning
Summer 1 Week 3

In our Maths, Topic and ICT lessons, we have started to learn about directions. This new learning will soon be linked to our work on maps too. Your Home Learning this weekend is to give directions from your home to a destination of your choice. You could choose our school, a shop, your friend's house, the local swimming pool, your favourite park, or anywhere else you like. You might choose to give the directions in number of steps or by using road names. It might be useful if you numbered each stage of the directions and laid them out like a set of instructions. We are expecting you to use words including *left*, *right*.

As a challenge, you also include a map to show the route you are giving directions for.
