

Year 2 Home Learning

Summer 2 Week 1

In Science, we have been learning about the Basic Needs humans need to survive – air, food, water and shelter - and have discussed what humans might *want* but don't really *need*.

We know that animals usually have special features to help them survive, such as thick fur or claws. For this week's Home Learning, choose an animal and find out what they need to survive. You may like to draw a picture of your favourite animal, write some facts about how they are adapted to survive in their environment or just talk about your animal with an adult.
